

LA&HA Master's Program in Laser Dentistry

2017/2018

The Medical Power of Light

Boost your professional career in dentistry to new levels by becoming a Master in Laser Dentistry.

The Laser and Health Academy (LA&HA) offers a comprehensive Master's Program that provides everything you need to know to become a skilled laser specialist. Key benefits of the LA&HA Master's Program include:

- 200 hours of active training by high-level industry experts and skilled professionals in multiple fields of dentistry
- Module-based training in a supportive and highly functional educational setting with the most efficient and up-to-date laser technologies
- Hands-on clinical training sessions with close supervision at advanced and highly experienced dental laser centers.

Objectives & Curriculum

The LA&HA Master's Program in Laser Dentistry is an educational curriculum designed by the Laser and Health Academy to provide participants with a comprehensive level of knowledge about basic and in-depth laser principles as well as the skills and competency needed for using Fotona dental laser systems in a range of dental specialties. Participants are required to have a DDS diploma and at least 3-years of experience in dentistry. During the Program, participants are expected to gain advanced knowledge, skills and the confidence to use a Fotona dental laser system safely and successfully in their dental practices.

The program consists of theoretical lessons, hands-on activities, individual study, as well as the observation and performance of live clinical operations. After each module, the participant's learning improvement is assessed by examination. By the end of the program, participants are required to perform and present their own 20 laser-assisted clinical cases from among all dental specialties.

After successful participation in the Master's program, participations will receive the following title issued by the Laser & Health Academy:

LA&HA Master in Laser Dentistry

The award ceremony takes place every year during the LA&HA Symposium.

Duration

Participants can finish the LA&HA Master's Program within one year, in five modules for 3-4 days at a time. There is also an option to extend attendance over a maximum of three years. Between the modules, participants are required to learn by themselves, as well as assess their own knowledge on-line. This modular approach enables participants to implement their knowledge and skills in the dental office immediately after each module. The program involves 200 active hours of training.

Location

Participants can choose the most appropriate location for the clinical modules from the list of LA&HA's partnering dental education centers, whereas the location of the first module is at the premises of LA&HA's offices in Ljubljana, Slovenia.

Language

The official language of the LA&HA Master's Program is English, however, if there is a group of participants speaking another language, the lectures can be organized in that language.

Price

Each module costs between 1.500 and 2.100 EUR + VAT per participant. The tuition fee includes comprehensive course documentation, lunches and refreshments during breaks.

Number of participants

Modules are conducted in a motivating atmosphere with attendance limited to between 6-10 participants.

Lecturers

LA&HA provides the most qualified speaker for each topic from a pool of experienced LA&HA lecturers and university professors who are cooperating in a variety of workshops and seminars offered by LA&HA.

LA&HA Master's Program Topics

- Laser physics
- Laser safety
- Laser interactions with biological tissues
