

## Pigments & Beyond

**Are you ready to elevate your approach to pigmented lesions? Join us for an exclusive workshop where you'll learn invaluable tips & tricks from a true master of the craft.**

During this workshop, you will get a closer look into how one of the best clinical experts in the field of laser treatments uses Fotona's Q-switched laser system to treat five endogenous pigmentations: melasma, solar lentigines, dermal melanosis, and post-inflammatory hyperpigmentation.

This distinguished dermatologist and aesthetic laser expert will explain and discuss the practical and clinical advantages of lasers and laser-assisted therapies as well as the effects of various treatment parameter settings based on actual case materials.

### **Objectives:**

- **Parameter Mastery:** Learn to navigate different parameter settings and tailor them to specific conditions.
- **Indications Overview:** Explore a comprehensive overview of indications for pigment-removal laser treatments.
- **Scientific Insights:** Get to know the scientific principles driving these extraordinary minimally invasive therapies.
- **Maximize Benefits:** Discover strategies to enhance your practice using Fotona laser systems.
- **Interactive Session:** Engage with our expert speaker, ask questions, and refine your skills.
